Physical Geodesy: Global Elastic Deformation of the Earth

Jun-Yi Guo

Division of Geodetic Science

School of Earth Sciences

The Ohio State University

1. Page 122, eq (2.489):
Change “ H_m ” to “ H_n ” after the second sum sign.

2. Page 123, eq (2.490), last line:
Change

$$\frac{1}{r \sin \theta} \frac{\partial B_\lambda}{\partial \lambda} + \frac{1}{r} A_\lambda B_\lambda$$

to

$$\frac{1}{r \sin \theta} A_\lambda \frac{\partial B_\lambda}{\partial \lambda} + \frac{1}{r} A_\lambda B_r$$

3. Page 123, eq (2.491), second line, last term in the parentheses:
Change “ B_λ ” to “ B_r ”
4. Page 154, below eq (3.118):
Change “ R ” to “ $\vec{R}$ ”
5. Page 236, from eq (4.40) to eq (4.43):

$$\begin{aligned} \Pi &> \left[1 - \frac{\alpha}{(N+1)N} \right] \cdots \left[1 - \frac{\alpha}{(i-3)(i-4)} \right] \left[1 - \frac{\alpha}{(i-1)(i-2)} \right] \\ &\quad \times \left[1 - \frac{\alpha}{(i+1)i} \right] \left[1 - \frac{\alpha}{(i+3)(i+2)} \right] \cdots \left[1 - \frac{\alpha}{(i+l+1)(i+l)} \right] \cdots \end{aligned} \quad (4.40)$$

Take the logarithm on both sides,

$$\begin{aligned} \ln \Pi &> \ln \left[1 - \frac{\alpha}{(N+1)N} \right] + \cdots + \ln \left[1 - \frac{\alpha}{(i-3)(i-4)} \right] \\ &\quad + \ln \left[1 - \frac{\alpha}{(i-1)(i-2)} \right] + \ln \left[1 - \frac{\alpha}{(i+1)i} \right] \\ &\quad + \ln \left[1 - \frac{\alpha}{(i+3)(i+2)} \right] + \cdots + \ln \left[1 - \frac{\alpha}{(i+l+1)(i+l)} \right] + \cdots \end{aligned} \quad (4.41)$$

As $\lim_{l \rightarrow \infty} \{\alpha / [(i+l+1)(i+l)]\} = 0$, we have

$$\lim_{i \rightarrow \infty} \left\{ \ln \left[1 - \frac{\alpha}{(i+l+1)(i+l)} \right] \middle/ \left[-\frac{\alpha}{(i+l+1)(i+l)} \right] \right\} = 1, \quad (4.42)$$
